Interest

Software development, robotics, computer vision, system programming, embedded development

Education

- 2020 - 2024 **Bachelor**, *SPbU, Saint-Petersburg, Faculty of Mathematics and Computer Science*
Mathematics, algorithms, data science
- 2022 - 2024 **Bachelor**, *UCLan Cyprus, Pyla, School of Science*
Computing

Experience

- February 2026 - Present **JetBrains**, *Software developer*
- May 2024 - **JetBrains**, *Research and educational assistant*
- February 2026
- Robotics development (autonomous driving, embedded) - redesigned [Duckiebot](#) autonomous driving stack to ROS2
 - Neural networks development for computer vision - developed new lane marking recognition stack for Duckiebots (with [publication](#))
 - Neural networks deployment on edge devices - created [utility](#) for benchmarking Neural networks across Edge TPU, edge GPU and CPU
 - Teaching university courses - developed from scratch and taught "Programming fundamentals with C and Linux" and "Robotics and CV" courses; taught "Operating systems" course
 - Organizing bootcamp - helped in organization and conducting bootcamp - [JASS](#)
- September 2022 - May 2024 **Ice measuring system**, *Development intern*
- Development utility for generation synthetic data for adjusting computer vision algorithms.
 - Development machine learning algorithms for detecting the width of the ice channel left by icebreaker based on camera frames
- February 2023 - June 2023 **Veeroute**, *Development intern*
- Development of combinatorial optimisation engine
 - Creating tests and benchmarks

Russian Native
English B2
Greek A1

Skills

Legend

■ ■ ■ ■ ■	basic knowledge	■ ■ ■ ■ ■	extensive project experience
■ ■ ■ ■ ■	intermediate knowledge with some project experience	■ ■ ■ ■ ■	deepened expert knowledge
		■ ■ ■ ■ ■	expert / specialist

	Level	Skill	Years	Comments
Programming languages:	■ ■ ■ ■ ■	C	4	<i>I teach C at University. Applied it in "Programming fundamentals" course as well as "Operating systems" and "Robotics" courses. Used it with OpenCL for GPU computations. Use it for pet projects</i>
	■ ■ ■ ■ ■	C++	4	<i>I used C++ in my robotics development. The most recent project was: development of hardware simulator - utility to emulate robotics sensors and actuators</i>
	■ ■ ■ ■ ■	Python	3	<i>Used a lot for ML/DL and ice cover generation applications. Worked with Pandas, NumPy, Matplotlib, SciPy, Sklearn, CatBoost, XGBoost, PyTorch libraries</i>
	■ ■ ■ ■ ■	Kotlin	2	<i>My main language for now</i>
OS and tools:	■ ■ ■ ■ ■	Linux	5	<i>I use Linux (Ubuntu) as my main OS, in addition I teach Linux at university. Configured and administrated a few small servers in laboratory</i>
	■ ■ ■ ■ ■	Make & CMake	4	<i>Using them often as main build systems for my C/C++ projects and teaching</i>
	■ ■ ■ ■ ■	Docker & Compose	3	<i>Using them every day.</i>
Other:	■ ■ ■ ■ ■	Computer vision	2	<i>Used at JetBrains and during the icebreaker project. Also both of my thesis were related to computer vision</i>
	■ ■ ■ ■ ■	Machine learning	2	<i>I have experience at developing ML/DL algorithms, data preprocessing and models deployment. Field of interest: computer vision</i>
